

CHAPTER 21.1: Darwin and Natural Selection

1. How did the observations during his voyage on the Beagle influence Darwin's theories?

2. Why were the Galápagos Islands so important to Darwin's observations?

3. What are the elements for the formation of new species?

4. What was Wallace's role in evolutionary theory?

5. What influence did Malthus have on both Darwin and Wallace?

6. Identify the two principles of Lamarck's theory of evolution.

7. Distinguish between Lamarck's concept of evolution and Darwin's.
